

hexstring2data

parse_canframe

asc2nibble

```
graph LR; A[hexstring2data] --> C[asc2nibble]; B[parse_canframe] --> C;
```

The diagram illustrates a data flow where two separate inputs, 'hexstring2data' and 'parse_canframe', are processed by a single function named 'asc2nibble'. The inputs are represented by white rectangular boxes on the left, while the output function is a gray rectangular box on the right. Two blue arrows originate from the right side of the input boxes and point towards the left side of the 'asc2nibble' box, indicating the direction of data flow.
