

CanDump::Open

fprint_long_canframe

snprintf_can_error
_frame

```
graph LR; A[CanDump::Open] --> B[fprint_long_canframe]; B --> C[snprintf_can_error_frame];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'CanDump::Open', followed by an arrow pointing to a box labeled 'fprint_long_canframe', and finally an arrow pointing to a shaded box labeled 'snprintf_can_error_frame'. The shaded box contains the text 'snprintf_can_error' on the top line and '_frame' on the bottom line.
